DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-66 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 6,206,883. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences are claims 1-11 and 15-24 of the reference is the combination of the instant claims 34-41 and 45-54, the instant claims 42-44 and 45-are read on the combination of claims 12-14 and 17-21 of the reference, and claims 25-31 of the reference is the combination of the instant claims 55, 62-65 and 56-61.

Therefore, it would have been obvious to one of ordinary skill in the art to combine the claims of the reference to get the instant claims, for the reasons as stated above, since they have been shown to be effective in a similar system and thus would

have been expected to provide adequate results. There is no showing of unexpected results derived from said use.
